

MiniMicro

Event Playback (1, 2 or 4 Camera System)

Playback video from the MicroView is fast and easy. It is equipped with eight sensor inputs for marking events. A search can be conducted by time, date, or "emergency." When in playback mode, the user has the option to choose "fast forward" (at rates of x2, x4, or x8), "rewind," "pause," and "stop." For driver activated event-marking, we enable direct data transfer to a USB 2.0 Memory Key for marked-event viewing on-the-go.

High Resolution Video & Clear Audio

The MicroView has crisp video at 720 x 584 resolution for DVD quality playback. Industry-best sound quality is recorded on 4 individual audio channels.

Archiving

Several options are available to save the video. It can be saved on the hard drive or transferred to DVD, VHS, and other forms of archiving. The hard drive can also be directly connected to the computer through a USB reader connection.

Massive Storage Capacity

The latest MPEG4 and JPEG Compression (Switchable) technology provides motion picture quality while offering greater storage capacity. The MicroView has the ability to store over 30 days of video on continuous cycling recording.

Security

A key-locking hard drive secures removable hard drive tray. There are no user-selectable buttons on the face of the DVR. All data is securable through password. The removable drive has a separate lock preventing its removal.

Features

- *SATA Hard Drive*
- **2 Channel Video**
- **DVD quality playback**
- **Key-locking Hard Drive**
- **3 Year Warranty**

MiniMicro

AngelTrax's MiniMicro is the ideal mobile video solution for organizations seeking an economical, sturdy and dependable DVR unit. The MiniMicro comes standard with one and a half channels and a 160GB hard drive. The hard drive is removable and can store up to 30 days of real time video data.

Mobile Video Surveillance

AngelTrax School Bus Video Surveillance Systems use "Cutting Edge Technology" exclusively designed for the school bus industry. Angeltrax, absolutely the industry's best and most reliable Mobile Video Surveillance Systems available.

AngelTrax MASS TRANSIT Video Surveillance Systems use "Cutting Edge Technology" exclusively designed for the Mass Transit industry. Engineers have strategically studied hundreds of Mass Transit bus configurations insuring proper placement of the [*PeriOptic Lens Cameras.*](#)

The screenshot displays the AngelTrax software interface. On the left, there are eight camera feeds arranged in a 3x3 grid (with the bottom-right cell empty). The top row shows interior views of the bus seats. The middle row shows exterior views of the bus from different angles. The rightmost column features a map showing the bus's current location on a road. Below the camera feeds is a 'Camera Select' grid with buttons numbered 1 through 8. At the bottom, there are playback controls including a 'Time Line Scale', 'Pause' button, and a 'PLAY' button. The interface also includes a 'Screen View' section with 'Enhanced Quality' options and a volume control slider. On the right side, there is a menu with options like 'Open New File', 'Save as JPEG', 'Create Media File', 'Backup File', 'On Screen Display', and 'Auto Browse'. Below the menu is an 'Account Management' section and a calendar for 'January 2009' with the 5th highlighted. At the bottom right, there is a call to action: 'Call 1-800-675-1755 for Technical Support'.
